

RESTCONF

LAB - 2

Disclaimer

This Lab Guide is designed to assist candidates to facilitate Technology learning. While every effort has been made to ensure that all material is as complete and accurate as possible, the enclosed material is presented on an “as is” basis. Neither the authors nor RSTForum assume any liability or responsibility to any person or entity with respect to loss or damages incurred from the information contained in this Lab guide. This workbook was developed by RSTForum. Any similarities between material presented in this Lab Guide and any other Lab Guide or any other material is completely coincidental.

Setting Up Cisco Routers for RESTCONF

Step 1: Setting Up RSA based authentication

1. On cisco IOS XE CRS1000v router do the following configuration.

```
config t
username cisco privilege 15 secret cisco
```

2. Enable encryption module to generate RSA key.

```
ip http secure-server
```

Step 2: Setting Up RETCONF

1. On cisco IOS XE CRS1000v router do the following configuration.
2. Enable RESTCONF interface

```
configure terminal
restconf
```

Alright, you should be all set and ready to start the lab!
